
	KUTCH COPPER LIMITED	Version: 01
	CLIMATE CHANGE POLICY	Date.: 04.12.2025

Kutch Copper Limited (KCL), we acknowledge climate change as a significant global challenge with potential implications for business continuity, ecosystems, and communities. In alignment with AEL's sustainability vision and its support for the Paris Agreement goals, KCL is committed to progressively integrating climate considerations into its operations and decision-making and is applicable to all employees and business partners. We aim to identify and manage climate-related risks and explore opportunities for enhancing resilience and resource efficiency in a manner consistent with evolving best practices.

KCL will strive to:

- Operate in accordance with applicable energy and emissions regulations through integrated governance approaches.
- Measure and disclose direct and indirect GHG footprint.
- Communicate climate-related impacts, actions, and progress through appropriate sustainability reporting channels.
- Integrate mitigation and adaptation into operations by applying the mitigation hierarchy and evaluating feasible low-emission and renewable energy alternatives.
- Explore opportunities to enhance energy efficiency through process improvements, equipment maintenance, and adoption of best available technologies.
- Consider measures to enhance resilience of facilities, workforce, and stakeholders to potential climate-related impacts.
- Periodically assess climate-related risks and impacts, including those affecting communities, ecosystems, and human rights.
- Encourage awareness and build capacity across the workforce and, where applicable, the value chain through targeted training, engagement, and procedural support.
- Engage relevant stakeholders in climate-related discussions, planning, and decision-making processes that may support climate mitigation and adaptation efforts.
- Promote responsible sourcing by supplier evaluations and engagement considering climate-related performance.

The aforesaid policy shall be made available to all the relevant stakeholders. The

policy shall be reviewed periodically, at least every two years, for its appropriateness and updated as necessary.

Oversight & Responsibility:

This policy is overseen by the Managing Director.

Under site leadership, the Operations and Maintenance (O&M) team is responsible for embedding climate considerations into relevant systems and processes.

Dr. Vinay Prakash

Managing Director
